**We will be opening Saturday April 27th. Daily hours from 4/27 to 6/1 are:
Monday to Saturday 10 a.m. until 3 p.m. Sunday 12 noon until 3 p.m.
In special cases—by appointment.**

***We only accept cash or checks.**

Please bring boxes with you.

CLOVERLAND FARMS' GREENHOUSES' 2024 Plant Offerings

What follows is a tentative list and description of the 305 different varieties of perennials, native perennials, herbs, annual flowers, and vegetable plants growing in our greenhouses. As this is a mom-and-pop operation and Pop had back surgery in the middle of sowing and transplanting, the plants are at various stages of growth (from seedlings to plants in bloom.)

PERENNIALS AVAILABLE FROM CLOVERLAND FARMS' GREENHOUSES:

**All are in plastic-free, plant-it-all CowPots and sell for \$2 each.
CowPots are fully biodegradable and reduce transplant shock.**

1. **Roadside Agrimony** (*Agrimonia striata*) **Native Perennial** Features spikes of yellow five-petaled flowers. Prefers full to partial sun and moist to medium-wet soils. Height 6'. Bloom time June to September. Grows in zones 3 to 10. Plant spacing 1' to 2'. **Deer Resistant.**

1A. **Mountain Gold Alyssum** (*Alyssum montanum*) This perennial alyssum features a low-growing trailing mound of silvery-gray foliage covered with a mass of bright-yellow flowers. Grows in full sun to partial shade and well-drained soils. Height 4" to 6". Bloom time is mid-spring to mid-summer. Grows in zones 3 to 9. Plant spacing is 6". **Deer Resistant.**

2. **Aromatic Aster** (*Symphyotrichum oblongifolium*) **Native Perennial** Aromatic Aster, like most asters, is a very important plant for fall pollinators. The plant is one of the last asters to bloom in the fall and features light purple flowers that turn reddish-purple as they mature. Aromatic Aster will grow 2 feet tall. Likes normal to dryer conditions, full sunlight, and is hardy from zones 3 to 8. Plant spacing 12-18 inches.

3. **Big-leaved Aster** (*Eurybia macrophylla*) **Native Perennial** Gets its name from the large, heart-shaped leaves that may be as much as 8" across. Prefers partial to total shade and soil that ranges from medium-wet to dry. Height is 12". Blooms August to October. Hardy in zones 3-7. Plant spacing is 2'-3'. Note: This plant can form a dense ground cover as it spreads by rhizomes.

4. **Calico Aster** (*Symphyotrichum lateriflorum*) **Native Perennial** Features loose clusters of multiple flowering heads. This species gets its name from the many different colored centers of its flowers. Likes full sun to shade in medium wet to medium dry soils. Height is 2'. Bloom time is August-October. Hardy in zones 3-9. Plant spacing is 18-36"

5. **Crooked-stemmed Aster** (*Symphyotrichum prenanthoides*) **Native Perennial** This aster features narrowleaves that clasp the zig-zagging stems. Flowers have pale violet petals with yellow centers. Prefers full to partial sun and medium-wet to moist soils. Height is 3'. Blooms August-October. Hardy in zones 4-7. Plant spacing 1-2'.

6. **Flat-topped Aster** (*Doellingeria umbellate*) **Native Perennial** Flat-topped Aster is an early-blooming aster with its creamy-white blossoms showing up in July. It likes moist to wet soils and full to partial sunlight. Height is 5 feet. Hardy in zones 3 to 8. Plant spacing is 1 to 3 feet.

7. **Frost Aster** (*Symphyotrichum pilosum*) **Native Perennial** Frost Aster, like most asters, is a very important plant for fall pollinators. The plant is one of the later asters to bloom in the fall and features white flowers with yellow centers that redden as they mature. Frost Aster will grow 3 feet tall. Likes slightly wet to dryer conditions, full sunlight, and is hardy from zones 3 to 9. Plant spacing 2 to 3 feet.

8. **Heart-leaved Aster** (*Symphyotrichum cordifolium*) **Native Perennial** Typified by its heart-shaped leaves; this aster produces light blue flowers on 3' plants. Blooms September-October. Likes partial shade to shade. Prefers normal moisture conditions to medium dry conditions. Winter hardy in zones 3-9. Plant spacing 18"-24"

9. **Heath Aster** (*Symphyotrichum ericoides*) **Native Perennial** Heath asters produce a profusion white ray flowers with yellow centers from August to October. Likes full to partial sun and medium to medium dry soils. Grows to a height 2'. Winter hardy in zones 3-9. Plant spacing 12"-18".

10. **New England Aster** (*Symphyotrichum novae-angliae*) **Native Perennial** If you are lucky enough to have this species in your landscape, you know the beautiful purple haze of flowers it produces in the fall. Like other aster species, it is very important to fall pollinators. Flower color is purple. Height is 3 to 6 feet. Likes medium dry to wet soils. Blooms August to October. Attracts birds, bees, butterflies and is the host plant to the Pearl Crescent and Checkerspot butterflies. Full sun to partial sun. Hardy in zones 3-8. Plant spacing 2-3 feet.

11. **New York Aster** (*Symphyotrichum novi-belgii*) **Native Perennial** New York Aster, like most asters, is a very important plant for fall pollinators. The plant blooms from August through October and features purple flowers with yellow centers. New York Aster will grow to 4 feet tall. Likes medium wet to medium dry conditions, full to partial sunlight, and is hardy from zones 3 to 8. Plant spacing 2 to 3 feet.

12. **New York Mix Aster** **Domesticated Native Perennial** These 4 ft. tall perennials produce showy September and October flowers in shades of blue, pink, and white. Blooms provide plenty of nectar for bees and butterflies. Adaptable plants thrive in full sun or semi-shade. One of the most cold-hardy perennials: New York asters are winter hardy to zone 2. Plant 18-24" apart. Full to partial sun.

13. **Panicked Aster** *Symphyotrichum lanceolatum* **Native Perennial** As with most Asters, these bloom mainly in the late Summer and Fall. Flowering later in the season, it provides nectar for fall pollinators. Lives in moderately moist to medium wet soils. Grows to 4 feet. Likes full sun. Blooms August to October. Attracts birds, bees, and butterflies. Hardy to zone 3. Plant spacing 18-36".

14. Shining Aster (*Symphyotrichum firmum*) Native Perennial Shining Aster, like most asters, is a very important plant for fall pollinators. The plant features white to pale blue flowers that measure up to 1.5 inches wide from August through October. Shining Aster will grow from 3 to 8 feet tall. Likes normal to wet conditions, full to partial sunlight, and is hardy from zones 3 to 9. Plant spacing 2-3 feet.

15. Short's Aster (*Symphyotrichum shortii*) Native Perennial Short's Aster, like most asters, is a very important plant for fall pollinators. The plant features blue-white flowers from August through October. Short's Aster will grow to 3 feet tall. Likes normal to medium-dry conditions, partial sun to shade, and is hardy from zones 3 to 8. Plant spacing 12-18 inches.

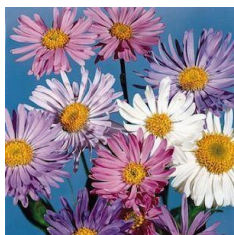

16. Silky Aster (*Symphyotrichum sericeum*) Native Perennial Silky Aster, like most asters, is a very important plant for fall pollinators. The plant features violet-purple flowers from August through October. This aster is called silky because of the fine hairs on the leaves that give it a silver-green appearance and a silky feeling. Silky Aster will grow to 12 inches. Likes medium-dry to dry conditions, full to partial sun, and is hardy from zones 3 to 8. Plant spacing 1 to 2 feet.

17. Sky Blue Aster (*Symphyotrichum oolentangiense*) Native Perennial Sky-Blue Aster, like most asters, is a very important plant for fall pollinators. The plant features blue-violet flowers from August through October. Sky Blue Aster will grow to 3 feet. Likes normal to dry conditions, full to partial sun, and is hardy from zones 3 to 8. Plant spacing 1 to 2 feet.

18. Smooth Blue Aster (*Symphyotrichum laeve*) Native Perennial Smooth Blue Aster, like most asters, is a very important plant for fall pollinators. The plant features blue-violet flowers from August through October. Smooth Blue Aster serves as host to Silvery Checkerspot and Pearl Crescent butterflies. Smooth Blue Aster will grow to 4 feet. Likes medium-wet to medium dry conditions, full to partial sun, and is hardy from zones 3 to 9. Plant spacing 18 to 24 inches.

19. Trimix Alpine Aster (*Aster alpinus*) Features flowers in the shades soft blue, pink, rose, and white. Prefer partial shade. Height 12". Winter hardy to zone 4. Plant spacing is 12".

20. Willow Aster (*Symphotrichum praealtum*) **Native Perennial** An attractive bloomer that forms dense colonies. Can spread by rhizomes. Features Blue-violet flowers at the top of its stems from September to October. Likes full to partial sun and wet to medium soils. Height is 3'. Winter hardy in zones 3-9. Plant spacing of 2'-3'.

21. Blue Balloon Flowers An easily grown perennial that features large star-shaped blue flowers in late summer and early fall. Likes full sun to partial shade and well-drained soil. Height is 18". Winter hardy in zones 4-9. Plant spacing 10". **Deer Resistant.**

22. Rose Balloon Flowers An easily grown perennial that features large star-shaped pink-rose flowers in summer and early fall. Likes full sun to partial shade and well-drained soil. Height is 18". Winter hardy in zones 3-9. Plant spacing 10". **Deer Resistant.**

23. White Balloon Flowers An easily grown perennial that features large star-shaped white flowers in summer and early fall. Likes full sun to partial shade and well-drained soil. Height is 18". Winter hardy in zones 3-9. Plant spacing 10". **Deer Resistant.**

24. Fuji Blue Balloon Flowers grow into nice full plants that are 24-36" tall. 2" star-shaped flowers form from balloon-shaped buds from June until August. Plant 1'-1.5' feet apart. Prefers part sun to light shade and regular watering. **Deer resistant.** Winter hardy to zone 3.

25. Bee Balm (*Monarda fistulosa*) Also known as Wild Bergamot. **Native Perennial** When in bloom, the masses of flowers are a feast for the eyes and the pollinators that are everywhere upon them. The crushed flower and leaves deliver a strong minty smell that is irresistible. Likes full sun to partial sun and medium-wet to dry soils. Height to 4 feet. Blooms July to September. Attracts Birds—especially hummingbirds, and Butterflies. Winter hardy from zone 3 to 9. Plant spacing 2'-3'. **Deer Resistant.**

26. Bergamo Bee Balm has intense rose-purple blooms that make excellent cut flowers. Very disease resistant. Grows to 2 feet. Short-lived perennial. Fleuroselect Gold Medal winner. Like full sun. Space 1 to 2 feet apart.

27. Panorama Mix Bee Balm (*Monarda fistulosa*) Domesticated Native Perennial Panorama Mix Bee Balm produces whorls of semi-double flowers in shades of pink, salmon, red, scarlet, and crimson through June and July. Plants grow to 3 ft. tall and are mildew resistant and winter hardy to zone 3. Plant 1 to 2' apart. **Rabbit and Deer resistant.** Hummingbirds and butterflies really appreciate this plant. Full sun to light shade.

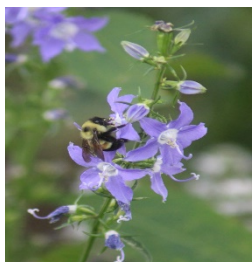

28. Panorama Red Shades Bee Balm (*Monarda fistulosa*) Domesticated Native Perennial Panorama Red Shades Bee Balm produces red to scarlet flowers in June and July. Plants grow to 3 ft. tall and are mildew resistant and winter hardy to zone 3. Plant 1 to 2' apart. **Rabbit and Deer resistant.** Hummingbirds and butterflies really appreciate this plant. Full sun to light shade.

29. Bellflower (*Campanula carpatica*) A low growing compact campanula that lends itself to being a groundcover. Prefers full sun and moist, well-drained soils. Height 8". Bloom color is sky blue and blooms from summer to fall. Grows in zones 3 to 8. Plant spacing 10". **Deer Resistant.**

30. Cluster Bellflower (*Campanula glomerata acaulis*) One of the smaller Bellflower varieties. Prefers full sun to partial shade and well-drained soils. Height 8". Bloom time from late spring to early fall. Grows in zones 2 to 7. Plant spacing is 18". **Deer Resistant.**

31. Tall Bellflower (*Campanula americana*) Native Biennial Also known as American Bellflower. Prefers partial shade to shade and medium-wet to medium-dry soil. Height 3'-5'. Bloom time is July-October. Winter hardy from zone 3 to 8. Plant spacing 18"-24". **Deer Resistant.** Note: This plant will self-seed.

32. Big Bluestem (*Andropogon gerardii*) **Native Perennial** An impressive warm season grass. Prefers full to partial sun and medium-wet to dry soils. Height 7'. Bloom time June to September. Grows in zones 3 o 9. Plant spacing 2' to 3'. Note: Big Bluestem can spread and may not be suitable in small planting areas. Important host plant to many insects. Provides food and shelter throughout the winter. **Deer Resistant.**

33. Little Bluestem (*Schizachyrium scoparium*) **Native Perennial** A very popular native warm-season grass that is an important host plant while providing food and shelter for wildlife. Prefers full to partial sun and moist to dry soil. Height 3'. Bloom time July to October. Grows in zones 3 to 9. Plant spacing 2' to 3'. **Deer Resistant.**

34. Boneset (*Eupatorium perfoliatum*) **Native Perennial** Boneset prefers full to partial sun and wet to moist soil. Plant height is 4'. Bloom time is July-September. Grows in zones 3 to 8. Plant spacing is 1'-2' **Deer Resistant.**

35. Tall Boneset (*Eupatorium altissimum*) **Native Perennial** Tall Boneset prefers full to partial sun and medium-wet to medium dry soil. Plant height is 4'. Bloom time is August-October. Grows in zones 4 to 9. Plant spacing is 1'-2' **Deer Resistant.**

36. Black-eyed Susan (*Rudbeckia hirta*) **Native Biennial** produces bright yellow flowers that bloom anywhere from June through October. This plant is of high-value to pollinators. Flower color is yellow with dark cone. Height is 2 feet. Will grow in full sun to partial sun and in medium-dry to medium-wet soils. Attracts birds and pollinators. Winter hardy in zones 3 to 9. Plant spacing 10 to 12 inches. Host to Silvery Checkerspot Butterfly **Deer Resistant.**

37. Dense Blazingstar (*Liatris spicata*) **Native Perennial** The familiar purple spikes of this Liatris are seldom seen without a butterfly hanging on. In the fall when seeds are ripe, the butterflies are replaced by birds, typically finches, that ravage the feast. An important habitat plant. Flower color is pink or purple. Likes full to partial sun and prefers moderately moist to wet soils. Height is 3 to 6 feet. Bloom time is July to September. Grows in zones 3 to 10. Plant spacing 1-2'. **Deer Resistant.**

38. Broomsedge (*Andropogon virginicus*) **Native Perennial** This grass grows strongly upright and is often planted for its fall/winter color. Also called Broomstraw. Prefers Full to partial sun and moist to dry soils. Height is 4'. Bloom time is August to September. Grows in zones 4 to 8. Plant spacing 18" to 24".

39. Brown-eyed Susan (*Rudbeckia triloba*) This perennial produces a multitude of bright yellow flowers with a brown center cone. Prefers full to partial sun and medium-wet to medium-dry soils. Height is 5'. Grows in zones 3 to 9. Plant spacing 1' to 3'. **Deer Resistant.**

40. Butterfly Bush (*Buddleia davidii*) Also called Summer Lilac. A tall perennial that produces graceful, long, large, fragrant plumes of lilac-like flowers in attractive shades of deep purple, bright pink, and clear white. Easy to grow, it flowers the first year when started early. Likes full sun and most, well-drained soils. Height 6' to 8'. Grows in zones 5 to 9. Plant 4' to 6' apart.

41. Double Mixture Cup and Saucer Campanula Note: This is a biennial! Plants will bloom in the second year. Cup and Saucer Campanula features large and stunning, blue, pink, or white double flower bells. Prefers part sun and moist soil. Height is 3'. Winter hardy in zone 5. Plant 6-12" apart.

42. Telham Beauty Peach-leafed Campanula This Bellflower produces soft china-blue 3-inch cup-shaped flowers on sturdy 3 foot plants from late spring into early summer. Height 3'. Hardy to Zone 3 to 7. Space 12 to 18 inches apart. **Deer resistant.**

43. Canada Milk Vetch (*Astragalus canadensis*) **Native Perennial** Canada Milk Vetch features creamy greenish-white flowers that serve as an important nectar source for bumblebees and honeybees. This plant likes full to partial sun and medium-wet to dry soil. Height is 3'. Bloom time is June – August. Grows in zones 3 to 8. Plant spacing 18" to 24".

44. Whistler White Candytuft (*Iberis sempervirens*) Naturally compact plants featuring a blizzard of white blossoms. Prefers full sun to partial shade and well-drained soils. Height 4' to 8". Bloom time is early to late spring. Grows in zones 4 to 9. Plant spacing is 10" to 12". **Deer Resistant.**

45. Cardinal Flower (*Lobelia cardinalis*) Native Perennial If you want Hummingbirds, this is the plant for you. It is not uncommon to see numerous hummers at once vying for a turn at the tubular flowers on this brilliant red plant. A true spectacle. Cardinal flower is a dazzling, bright red, native perennial wildflower found in moist to wet areas in most of the United States and eastern Canada. Typically found along stream sides, marsh areas and woodland clearings. A great garden species. Flower color is red. Grows in full sun to partial sun and likes moderately moist soil to wet soil. Height 4'. Bloom time is July to September. Grows in zones 4 to 9. Plant spacing 6" to 16". **Deer Resistant**

46. Purple Prairie Clover (*Dalea purpurea*) Native Perennial An important legume within the native plant community. The thimble-shaped flowers bloom from the bottom to the top. Likes full to partial sun and moist to dry soils. Height 2'. Bloom time is July to October. Grows in zones 3 to 8. Plant spacing is 18' to 24". **Deer Resistant.** Note: This legume has been inoculated with the proper bacteria to maximize nitrogen fixation.

47. Fancy Mixed Columbine (*Aquilegia caerulea*) Prefers full sun to partial shade and well-drained soils. Height 24" to 36". Blooms in spring to early summer. Grows in zones 3 to 9. Plant spacing 16". **Deer Resistant.**

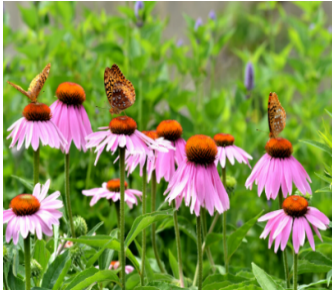

48. Wild Red Columbine (*Aquilegia canadensis*) Native Perennial This perennial is an early bloomer. Hummingbirds pollinate the plant. Does well in partial shade—needs at least four hours of sun. Can also grow in full sun. Likes moderately moist to dry soils. Height is 1' to 3'. Bloom time is from April to June. Grows in zones 3 to 8. Plant spacing 10" to 17". **Deer Resistant.**

49. Compass Plant (*Silphium laciniatum*) Native Perennial This perennial Silphium is the plant Aldo Leopold wrote about in *A Sand County Almanac*. This sunflower-like plant will orient itself to a north-south direction. Readily attracts bees, birds, and butterflies. Likes full to partial sun and medium--wet to dry soil. Height 3' to 8'. Blooms between July and September. Grows in zones 3 to 8. Plant spacing is 3-4'. **Deer Resistant.**

50. Cheyenne Spirit Coneflower (*Echinacea purpurea*) An All-America Selections winner. Has well-formed vivid flowers in shades of gold, scarlet, orange, red, purple, yellow, and cream. Prefers full sun and loam to clay soils. Height 30". Bloom time summer through early fall. Grows in zones 4 to 9. Plant spacing 18-24". **Deer Resistant.**

51. Purple Coneflower (*Echinacea purpurea*) Native Perennial Purple Coneflower will grow just about anywhere when planted and it occurs naturally in a good share of the United States and eastern Canada. This plant holds its bloom well throughout the growing season. Flower color is purple. Grows in full sun to partial sun and likes medium dry to medium wet soils. Height 3-5' Bloom time is July to September. Attracts birds, bees, and butterflies. Goldfinches will love you for it! Grows in zones 3 to 8. Plant spacing 10"-18". **Deer Resistant.**

52. Yellow Coneflower (*Ratibida pinnata*) Also known as Grey-headed Coneflower. **Native Perennial** Prefers full to partial sun and moist to medium dry soils. Plant height to 5'. Bloom time July to September. Winter hardy from zone 3 to 9. Plant spacing 18"-24". **Deer Resistant.**

53. Orange Coneflower (*Rudbeckia fulgida*) Native Perennial A butterfly favorite! Grows with a mounded habit. Prefers full to partial sun and medium-wet to medium dry soils. Plant height is 3'. Bloom time is July-August. Winter hardy from zone 3 to 9. Plant spacing 1' to 2'. **Deer Resistant.**

54. Upright Coneflower (*Ratibida columnifera*) Native Perennial Prefers full to partial sun and moist to dry soils. Plant height 3'. Bloom time June to August. Winter hardy from zone 3 to 9. Plant spacing 1'. **Deer Resistant.**

55. Firefly Coral Bells (*Heuchera sanguinea*) This superb selection produces loads of brilliant dark scarlet bell-shaped flowers on 12" stems from May to July. Hummingbirds love them and they are long lasting cut flowers. Great for edging the front of borders or use as a small-scale ground cover. Coral Bells maintain an attractive foliage throughout the winter. Prefers full sun to part shade and well-drained soils. Height 12" to 16". Bloom time is summer. Grows in zones 3 to 8. Plant spacing 12". **Deer Resistant.**

56. Palace Purple Coral Bells (*Heuchera micrantha*) Features burgundy foliage and white blossoms. Prefers full sun to partial shade and moist, well-drained soils. Height 18" to 24". Bloom time spring and summer. Grows in zones 4 to 8. Plant spacing 12" to 15". **Deer Resistant.**

57. American Dream Coreopsis (*Coreopsis rosea*) Rosy-pink, daisy-like flowers with yellow centers cover the fine-leaved foliage. Prefers full to partial sun and average, moist, well-drained soils. Height 8" to 16". Bloom time is early summer to early fall. Grows in zones 4 to 9. Plant spacing is 24" to 36". **Deer Resistant.**

58. Early Sunrise Coreopsis (*Coreopsis grandiflora*) A perennial coreopsis that flowers the first year. It features semi-double yellow flowers borne on compact plants. Likes full to part sun and well-drained soils. Height is 18" to 24". Bloom time is summer and fall. Grows in zones 4 to 9. Plant spacing is 18". **Deer Resistant.**

59. Tall Coreopsis (*Coreopsis tripteris*) **Native Perennial** Attracts bees, birds, and butterflies. Will grow in full sun to partial shade and likes medium wet to medium dry soils. Height is 7' to 9' feet. Grows in zones 4 to 8. Plant spacing 3' to 4'. **Deer Resistant. Note: This is a very tall but impressive perennial.**

60. Lance-leaf Coreopsis (*Coreopsis lanceolata*) **Native Perennial** With its familiar yellow flower, this beautiful member of the Coreopsis family is easy to establish and provides good first year color. Flower is yellow. Likes in full sun and dry to moderately moist soils. Height is 2 to 3 feet. Bloom time is June to September. Attracts bees, birds, and butterflies. Grows in zones 3 to 9. Plant spacing 10-16". **Deer Resistant.**

61. Sterntaler Coreopsis is particularly striking with 2-3 in. golden blooms with mahogany brown highlights. The 15-18 in. tall, easy-to-grow, drought-tolerant plants are heavy flowering; waves of showy bloom from May to October. Sterntaler coreopsis is a top performer for borders or pots. Coreopsis requires little maintenance, and are **rabbit and deer resistant**. Shear plants back occasionally to promote continuous flowering. Coreopsis flowers attract bees, birds, and butterflies. Plant 1' to 1.5' apart. Winter Hardy to zone 4. Full sun.

62. Sunburst Coreopsis has bright semi-double, golden yellow 2- inch flowers in Summer and Fall. Plant height is 3 feet. Winter hardy to zone 4. Plant spacing is 1 to 1.5 feet. Full sun.

63. Yellow Crownbeard (*Verbesina helianthoides*) **Native Perennial in Ohio** Not the most photogenic of plants, but does have large yellow flowers frequented by long-tongued bees like bumblebees, honeybees, and Cuckoo bees. Yellow Crownbeard prefers full to partial sun and moist soil. Height is 4' Bloom time is July-August. Grows in zones 5 to 8. Plant spacing is 2' to 4'.

64. Culver's Root (*Veronicastrum virginicum*) **Native Perennial** Culver's Root produces an unbranched plant that may grow to five feet and features candelabra-like spikes covered with white flowers that open from the bottom up. Likes full to partial sun and moderately moist soil but will grow in medium dry to medium wet soils. Height 5'. Will bloom between June and August. Grows in zones 3 to 8. Plant spacing 2-3'. **Deer Resistant.**

65. Cup Plant (*Silphium perfoliatum*) **Native Perennial** Cup plant is the watering station for the bird and insect world. The petiole, the place where the leaf joins the stem, gives the plant its name. This area fills with water after rains and holds it until it is drunk or evaporates. A large plant that seeds and reproduces freely. Flower color is yellow. Height is 3 to 6 feet. Will grow in full sun to partial sun and in moderately moist to medium wet soils. Bloom time is July to September. Attracts birds, bees, butterflies, and hummingbirds. Winter hardy in zone 4 to 8. Plant spacing 2-4'. **Deer Resistant.**

66. Habanera English Daisy does well in cool weather. It is grown in a similar manner as pansies. Plants will produce large quantities of wide, quilled double flowers from early Spring to early Summer. Blossoms come in red, rose, white with red tips, and white. Plants will often self-sow. Full sun to part shade. In our climate, plants need afternoon shade. Plant 6" apart.

67. Robinson's Mix Painted Daisy (*Chrysanthemum coccineum*) or Persian Chrysanthemum produce 2 to 3 in., yellow-eyed flowers. Flowers are terrific for cutting. Bloom is in late spring and early summer and when cut back after bloom, plants repeat in late summer. Vivid green, finely divided foliage is attractive. Prefers full sun and moist, well-drained soils. Height 18". Blooms in summer. Grows in zones 3 to 7. Plant spacing 18". **Deer Resistant.**

68. Bellamosa Mix Delphinium A species of Delphinium with more bushy growth and more flowering stems than most other delphiniums. The open and airy clusters of dark gentian-blue flowers are sure to delight one through Midsummer and into Fall. Plants grow 36" to 48" tall. Winter hardy to zone 4. Plant 18" apart. A very popular plant with hummingbirds and butterflies. Yet, it is **ignored by rabbits and deer**. Performs best in full sun to part shade. Grow in full sun to part shade.

69. Blue Delfix™ Delphiniums (*Delphinium grandiflorum*) These are the short, sturdy delphiniums. No staking needed. Likes full sun and well-drained soils. Height 12" to 15". Grows in zones 4 to 9. Plant spacing 6" to 10".

70. White Delfix™ Delphiniums (*Delphinium grandiflorum*) These are the short, sturdy delphiniums. No staking needed. Likes full sun and well-drained soils. Height 12" to 15". Grows in zones 4 to 9. Plant spacing 6" to 10".

71. Magic Fountains Mixed Delphiniums grow 30-36 in. tall, do not require staking, and provide plenty of cut flowers. Plants are winter hardy to zone 3. Plant 12"-18" apart. A very popular plant with hummingbirds and butterflies. Yet, **rabbits and deer ignore it**. Performs best in full sun to part shade.

72. Brilliant Maiden Pink (Perennial Dianthus) Candy-apple red flowers on long stems cover the 8" tall plants in early summer and again in the fall. Growth is low and spreading. Full sun to partial shade but prefers partial shade and well-drained soils. Winter hardy to zone 3. Plant 12" to 18" apart.

72A. Sonata Dianthus (*Dianthus plumarius Sonata*) Features a double flower mix that is short enough to be used as flowering ground cover. Prefers full sun and well-drained soils. Height 12". Bloom time is spring and summer. Grows in zones 4 to 8. Plant spacing is 12". **Deer Resistant.**

73. Arctic Fire Maiden Pink (Perennial Dianthus) Features showy frilled white flowers with bright red eyes that will bloom from spring into fall on evergreen, dark green foliage. Likes full to partial sun and well-drained soils. Height 6". Grows in zones 3 to 9. Plant spacing 12' to 16".

74. Sweet William Mix Dianthus (Dianthus barbatus) A short-lived perennial. Prefers full sun and well-drained soil. Height 18" to 24". Bloom time is spring and summer. Grows in zones 3 to 9. Plant spacing is 12". **Deer Resistant.**

75. Edelweiss (Leontopodium alpinum) Just like the ones in the Swiss Alps. Prefers full sun and gritty, well-drained soil. Height 6" to 8". Bloom time is summer. Grows in zones 3 to 9. Plant spacing 8". **Deer Resistant.**

76. Common Evening Primrose (Oenothera biennis) Native Biennial This biennial is often found in disturbed locations. However, this native plant features a long bloom time that benefits nectar-seeking moths, butterflies, caterpillars, and many species of bees. Prefers full to partial sun and medium wet to dry soils. Height to 6'. May bloom from June to October. Although it is a biennial, it will readily reseed. Winter hardy from zone 3 to 9. Plant spacing 1' to 2'. **Deer Resistant**

77. Glowing Magenta Evening Primrose (Oenothera kunthiana) Low and mounding with deep rose-pink flowers. Prefers full to partial sun and loves hot, dry sites. Height 12". Winter hardy to zone 5. Plant spacing 1'. **Deer Resistant.**

78. Missouri Evening Primrose Certainly one of the most beautiful of evening primroses. Clear-yellow, paper-thin blossoms up to 5 in. across appear June to September. Sprawling plants grow to 12 in. tall. Leaves are soft and velvety. Winter hardy to zone 4. Plant 12-18" apart. Full sun to part shade.

79. Pale Evening Primrose (*Oenothera pallida*) Features pale flowers with the essence of almonds. Prefers full sun to partial shade and well-drained soils. Height is 8" to 16". Bloom time is summer and early fall. Grows in zones 3 to 9. Plant spacing is 9" to 2". **Deer Resistant.**

80. Sunset Boulevard Evening Primrose features vivid 2-inch wide, cup-shaped blossoms that begin yellow but change to orange and then to red when mature. Plants are 2 feet tall. Winter Hardy to Zone 5. Should be planted 12 to 18 inches apart.

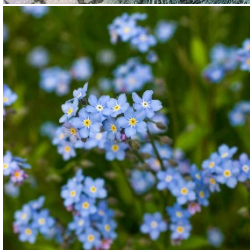

81. Blue False Indigo (*Baptisia australis*) **Native Perennial** This native legume will spend its first few years producing roots while maintaining a somewhat floppy disposition above ground. However, once establish, it will form a 4' bush-like structure. As it is a legume capable of fixing nitrogen, we have already inoculated the soil with the proper inoculant. Prefers full to partial sun and moist to medium-wet soils. Height 4". Bloom time is early in the season, usually May-July. Grows in zones 4-9. Plant spacing 2'-3. Host plant or Wild Indigo Duskywing. **Deer Resistant.**

82. White False Indigo (*Baptisia alba*) **Native Perennial** This native legume will develop charcoal-gray stems with bluish-green leaves and creamy pea-like blossoms. The plant lives in full to partial sun and medium wet soil to dry soil. Height is 4'. Blooms June-July. Grows in zones 4 to 9. Plant spacing is 2.5'-3.5'. Plant serves as host to Southern Dogface, Orange Sulphur, Clouded Sulphur, and Eastern Tail-Blue butterfly caterpillars. **Deer Resistant.**

83. Blue Fescue (*Festuca cinerea glauca Varna*) Features a unique blue-green tint and a clump-like growth that lends itself to make a nice border plant. Prefers full sun and average to dry soils. Height 10". Grows in zones 4 to 7. Plant spacing 12". **Deer Resistant.**

84. Blue Forget Me Not (*Myosotis alpestris*) Features multiple stems densely covered with delicate blue flowers. Prefers full sun to partial shade and moist soils. Height 12". Bloom time is spring to summer. Grows in zones 3 to 8. Plant spacing is 9" to 12". **Deer Resistant.**

85. Rose Forget Me Not (*Myosotis alpestris*) Features multiple stems densely covered with delicate rose-colored flowers. Prefers full sun to partial shade and moist soils. Height 12". Bloom time is spring to summer. Grows in zones 3 to 8. Plant spacing is 9" to 12". **Deer Resistant.**

86. White Forget Me Not (*Myosotis alpestris*) Features multiple stems densely covered with delicate white flowers. Prefers full sun to partial shade and moist soils. Height 12". Bloom time is spring to summer. Grows in zones 3 to 8. Plant spacing is 9" to 12". **Deer Resistant.**

87. Foxglove Beardtongue (*Penstemon digitalis*) **Native Perennial** Attracts Hummingbirds! This beauty shows off its white tubular flower for any bee that happens to be buzzing by looking for a place to collect pollen. Also adds interest in the fall. Birds often perch in its stiff upright branches well into the Winter. Flower color is white. Prefers full to partial sun and moist to medium dry soils. Height is 2 to 4 feet. Bloom time is June to July. Winter hardy from zone 4 to 8. Plant spacing 12-18". **Deer Resistant.**

88. Foxy Foxglove (*Digitalis purpurea* Foxy) **Biennial that will readily reseed.** A colorful, prolific, and long blooming foxglove. Prefers full sun to partial shade and well-drained soils. Height 24" to 36". Bloom time is early summer. Grows in zones 4 to 8. Plant spacing 12" to 18". **Deer Resistant. Note: Contains Digitalis and is poisonous.**

89. Monstrosa Foxglove (*Digitalis purpurea*) A unique foxglove that comes in the shades of pink, purple, white, and cream, but is topped by a XL bowl-like blossom. Prefers part sun to partial shade and well-drained soils. Height 4' to 5'. Bloom time is early summer. Grows in zones 4 to 8. Plant spacing 18" to 24". **Deer Resistant. Note: Contains Digitalis and is poisonous.**

90. Aristata Aurea Gaillardia One of the first Gaillardias to begin blooming and the last to stop. Prefers full sun and well-drained soils. Height 20" to 30". Bloom time is summer and fall. Grows in zones 3 to 10. Plant spacing is 24". **Deer Resistant.**

91. Aristata Bremen Gaillardia A very drought tolerant plant featuring scarlet and yellow daisy-like flowers. Prefers full sun and well-drained soils. Height 20" to 30". Bloom time is summer and fall. Grows in zones 3 to 10. Plant spacing is 24".
Deer Resistant.

92. Arizona Apricot Gaillardia A former AAS Winner. Gaillardias are fast growing, drought-tolerant plants that are nearly maintenance free, bursting with blooms from early summer through autumn. Abundant 3 to 4" blooms emerge early and continue into fall, painting landscapes and gardens of a Southwest sunset. Easily grown. Ideal for planters, pots, and landscapes. Prefers full sun and well-drained soils. Height 12". Hardy to grows in zones 3 to 10. Space 12-18" apart. **Deer Resistant.**

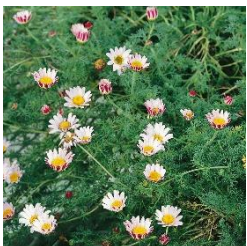

93. Arizona Red Shades Gaillardia Former AAS Winner. Gaillardias are fast growing, drought-tolerant plants that are nearly maintenance free, bursting with blooms from early Summer through Autumn. Abundant 3 to 4" blooms emerge in early summer and continue into fall, painting landscapes and gardens with colors of a Southwest sunset. Easily grown. Ideal for planters, pots, and landscapes. Prefers full sun and well-drained soils. Height 12". Grows in zone 3 to 10. Space 12-18" apart. **Deer Resistant.**

94. Arizona Red Shades Gaillardia Former AAS Winner. Gaillardias are fast growing, drought-tolerant plants that are nearly maintenance free, bursting with blooms from early Summer through Autumn. Abundant 3 to 4" blooms emerge in early summer and continue into fall, painting landscapes and gardens with colors of a Southwest sunset. Easily grown. Ideal for planters, pots, and landscapes. Prefers full sun and well-drained soils. Height 12". Grows in zone 3 to 10. Space 12-18" apart. **Deer Resistant.**

95. Mesa Red Hybrid Gaillardia are fast growing, drought-tolerant plants that are nearly maintenance free, bursting with blooms from early summer through autumn. Abundant 3 to 4" blooms emerge early and continue into fall, painting landscapes and gardens with colors of a Southwest sunset. Easily grown. Ideal for planters, pots, and landscapes. Prefers full sun and well-drained soils. Height of 14-16". Spread 20-22". Grows in zones 5 to 10. Space 20-24" apart. **Deer Resistant.**

96. Garden Gnome Anacyclus (*Anacyclus depressus*) A unique mat forming groundcover. Also called Carpet Daisy. Prefers full sun and well-drained soils. Height 4" to 6". Bloom time is early to late summer. Grows in zones 5 to 9. Plant spacing is 12" to 16". **Deer Resistant.**

97. Germander (*Teucrium canadense*) **Native Perennial** Once used in culinary and medicinal applications, Germander has been found to contain high levels of neoclerodane diterpenoid, which causes liver damage. Still, it is an important plant for pollinators. Prefers full to partial sun and medium-wet to medium-dry soils. Height 3'. Bloom time is July to September. Grows in zones 3 to 10. **Deer Resistant.**

98. Early Goldenrod (*Solidago juncea*) **Native Perennial** This species of goldenrod prefers full to partial sun and medium to dry soil. Height is 3'. Blooms with striking yellow flowers from July to September. Attracts bees, birds, and butterflies. Winter hardy from zones 3-7. Plant spacing of 1'-3'. Note: This plant can spread and may not be suitable for small planting areas. **Deer Resistant.**

99. Late Goldenrod (*Solidago gigantea*) **Native Perennial** This goldenrod prefers full sun to partial sun and moist to wet soils. Height is 6'. Bloom time is August-September. Winter hardy in zone 3-8. Plant spacing is 1'. **Deer Resistant.**

100. Ohio Goldenrod (*Oligoneuron ohioensis*) **Native Perennial** Ohio Goldenrod is a perennial goldenrod that will grow in wetter conditions. Tolerates moderately moist but will grow in medium wet to wet soil. Height is 3 feet. Blooms July-September. Attracts bees, other pollinators, birds, and butterflies. Likes full sun. Winter hardy from zone 4 to 6. Plant spacing 18-24". **Deer Resistant.**

101. Old Field Goldenrod (*Solidago nemoralis*) **Native Perennial** Also called Common Goldenrod Gray Goldenrod and Dwarf Goldenrod. Old Field Goldenrod works well in a perennial garden or a traditional landscape. Height is 2'. Prefers full to partial sun and medium dry to dry soils. Look for it to bloom in August and September. Attracts bees, birds, and butterflies. Winter hardy in zones 3-9. Plant spacing 8"-12". **Deer Resistant.**

102. Riddell's Goldenrod (*Oligoneuron riddelli*) **Native Perennial** Riddell's Goldenrod prefers full sun and moist to wet soils. Plant height is 3'. Blooms between August and October. Another fall pollen and nectar source for bees, other pollinators, and butterflies. Winter hardy from zone 3 to 7. Plant spacing 18-24". **Deer Resistant.**

103. Showy Goldenrod (*Solidago speciosa*) Native Perennial Showy Goldenrod is by name and character the showiest of the goldenrods. It like full to partial sun and normal to dry soil. It will grow to a height of 5 feet. Bloom time is September to November. Hardy in Zones 3 to 8. Plant 2 to 3 feet apart. **Deer Resistant**

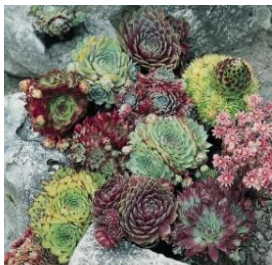

104. Stiff Goldenrod (*Oligoneuron rigidum*) Native Perennial Stiff Goldenrod has wide leaves which distinguish it from other goldenrods. Prefers full to partial sun and moderately moist soil, but can be found in medium wet to dry soils. Grows to 4 feet. Blooms between August and October. Grows in zones 3-9. Plant spacing of 1 to 2 feet. **Deer Resistant.**

105. Zig Zag Goldenrod (*Solidago flexicaulis*) Native Perennial Named for the way the stem zigzags between leaves. Prefers partial shade to full shade and likes medium-wet to medium-dry soils. Height is 3'. Bloom time is August to October. Winter hardy in zone 3 to 8. Plant spacing is 1'-2'. **Deer Resistant.**

106. Helenium (*Helenium autumnale*) Domesticated Native Perennial An impressive plant. Prefers full sun and well-drained soil. Height 48". Bloom time is summer. Grows in zones 4 to 8. Plant spacing 24". **Deer Resistant.**

107. Hen and Chicks are an evergreen, carpet forming succulents with thick, fleshy leaves. Plants grow as rosettes. Little offsets (chicks) cluster around parent rosette (hens). The clustered star-shaped summer flowers are often rosy-red, but can also be shades of pink, yellow, white, or green. Excellent in containers or rock gardens. Prefers full to partial sun and well-drained soils. Height 3" to 6". Winter hardy to zone 5. Spacing 12-18".

108. Chater's Double Mix Hollyhock features 4"-6" double flowers in a variety of colors. Chater's will begin to bloom in Early to Mid-Summer with 5' to 7' flower spikes. If flower spikes are cut back hard after blooming, plants will re-flower in late Summer and Fall. **Hollyhocks are biennials** or short-lived perennials but will readily re-seed. Hardy to zone 3. Plant 2' to 3' apart. Likes full to part sun.

109. Happy Lights Mix Hollyhock is a nice blend of pink, white, red, purple, and yellow blooms that form on 5' to 7' stalks. **Hollyhocks are biennials** or short-lived perennials but will readily re-seed. Hardy to zone 3. Plant 2' to 3' apart. Likes full to part sun.

110. Indian Spring Mix Hollyhock feature large single and semi-double flowers of deep rose, pink, salmon-pink, and white on plants that will form spikes up to 6' or 7'. 1939 All-America Winner. Often called the 'Outhouse Hollyhock' because it grew tall enough to screen the wiffy! **Hollyhocks are biennials** or short-lived perennials but will readily re-seed. Hardy to zone 3. Plant 2' to 3' apart. Likes full to part sun.

111. Summer Carnival Hollyhock has a wonderful mix of fully-double, peony-shaped flowers that come in the colors of crimson, pink, red, yellow, white, and rose. Plant height is 5 feet. **Hollyhocks are biennials** or short-lived perennials but will readily re-seed. Hardy to zone 3. Plant 2' to 3' apart. Likes full to part sun.

112. Zebrina Zebra Hollyhock has saucer-shaped flowers that are white or light pink, striped purple. They are arranged on long, 2-3 ft. spikes. The blooms are produced throughout the summer months. An easy-to-grow, 3-4 ft. tall **biennial** or short-lived perennial. Zebrina zebra hollyhock will usually self-sow and return year after year. Winter hardy to zone 3. Plant 2' to 3' apart. Likes full to part sun.

113. Anise Hyssop (*Agastache foeniculum*) Features beautiful fragrant purple flowers. Prefers full sun to partial shade and moist, well-drained soils. Height 36". Grows in zones 4 to 9. Plant spacing is 18". **Deer Resistant.**

114. Blue Anise Hyssop (*Agastache foeniculum*) This shorter Hyssop features spikes of bright blue flowers. Prefers full sun to partial shade and well-drained soils. Height 24". Bloom time is summer. Grows in zones 4 to 9. Plants spacing is 18". **Deer Resistant.**

115. Golden Jubilee Anise Hyssop (*Agastache foeniculum*) Impressive chartreuse-green foliage with leaves that smell like anise. Produces fragrant lavender flower spikes on 20" tall and 12" wide compact plants. Grows best in fertile, well-drained soil. Winter Hardy to zone 5. Plant spacing 12-18 inches.

116. Apricot Sprite Mexican Hyssop (*Agastache aurantiaca* *Apricot Sprite*) Features a sizzling blast of bright orange flowers. Prefers full sun to partial shade and well-drained soils. Height is 15" to 18". Bloom time is from spring until frost. Grows in zone 5 to 9. Plant spacing is 24". **Deer Resistant.**

117. Yellow Giant Hyssop (*Agastache nepetoides*) **Native Perennial** Features large spikes of tiny cream-colored flowers. Prefers full to partial sun and medium-wet to medium-dry soils. Height 6'. Bloom time is July to October. Grows in zones 4 to 8. Plant spacing 18" to 24". **Deer Resistant.**

118. Purple Giant Hyssop (*Agastache scrophulariifolia*) **Native Perennial** Features soft plumes of the palest purple flowers. Prefers full to partial sun and medium-wet to medium-dry soils. Height 6'. Bloom time is July to October. Grows in zones 4 to 8. Plant spacing 18" to 24". **Deer Resistant.**

119. Indian Grass (*Sorghastrum nutans*) Pretty in summer—outstanding in fall and winter. Features bronze colored seed heads on golden stems in the fall. Prefers full to partial sun and moist to dry soils. Height 6'. Bloom time is August to September. Grows in zones 3 to 9. Plant spacing 2' to 3'. Note: Indian grass spreads by rhizomes and may not be suitable for small planting areas. **Deer Resistant.**

120. Northern Blue Flag Iris (*Iris versicolor*) **Native Perennial** Our native Iris. Prefers full to partial sun and moist to wet soils. Height is 3'. Bloom time is May-July. Grows in zones 3-9. Plant spacing is 1' to 2'. **Deer Resistant.**

121. Common Ironweed (*Vernonia fasciculata*) **Native Perennial** Features brilliant cluster of purple flowers that draw the butterflies. Prefers full to partial sun and moist to medium wet soils. Height 6'. Bloom time July-September. Grows in zones 3 to 9. Plant spacing 2' to 3'. **Deer Resistant.**

122. Tall Ironweed (*Vernonia gigantea*) **Native Perennial** A member of the sunflower family with intense magenta flowers that are butterfly magnets. Prefers full to partial sun and moist to mediu-wet soils. Height is 5'. Bloom time is August to October. Grows in zones 5 to 9. Plant spacing 2" to 3'. **Deer Resistant.**

123. Blue Jacob's Ladder (*Polemonium Caeruleum Blue*) **Domesticated Native Perennial** Jacob's Ladder plants are heavy blooming, produce pendulous clusters of azure blue, 1 in. cup-shaped flowers on 1.5-2 ft. stems in late spring and early summer. Flowers attract butterflies and are excellent for cutting. Jacob's Ladder's lush, fern-like leaves are divided much like the rungs of a ladder. Will grow in full sun but prefers shade to partial shade. Likes medium wet to medium dry soils. Plant height 1', but taller when in bloom. Cut Jacob's Ladder back hard after flowering, this keeps plants neat, and encourages repeat bloom. Winter hardy from zone 3 to 8. Plant spacing 6'-12'. **Rabbit and deer resistant.**

124. White Jacob's Ladder (*Polemonium Caeruleum White*) **Domesticated Native Perennial** Jacob's Ladder plants are heavy blooming, produce pendulous clusters of azure blue, 1 in. cup-shaped flowers on 1.5-2 ft. stems in late spring and early summer. Flowers attract butterflies and are excellent for cutting. Jacob's Ladder's lush, fern-like leaves are divided much like the rungs of a ladder. Will grow in full sun but prefers shade to partial shade. Likes medium wet to medium dry soils. Plant height 1', but taller when in bloom. Cut Jacob's Ladder back hard after flowering, this keeps plants neat, and encourages repeat bloom. Winter hardy from zone 3 to 8. Plant spacing 6'-12'. **Rabbit and deer resistant.**

125. Jacob's Ladder (*Polemonium reptans*) Native Perennial Jacob's ladder is a spring blooming native typically found in woodland habitats. Will grow in full sun but likes partial shade. Likes moderately moist soil but can tolerate medium dry to medium wet. Height is 12". Bloom time is April to June. Winter hardy from zone 3 to 8. Plant spacing is 6"-12". **Deer Resistant.**

126. Hollow Joe Pye Weed (*Eutrochium fistulosum*) Native Perennial This species produces a beautiful puffy cloud of a bloom that sits atop a plant that grows 5 to 7' tall. Blooms between July and September and is a magnet to butterflies. Likes its feet a little on the wet side but grows well in moderately moist soil. Attracts bees, birds, and butterflies. Likes full sun to partial shade Hardy in zones 3-8. Plant spacing 3-4'. **Deer Resistant.**

127. Joe Pye Weed (*Eutrochium maculatum*) Native Perennial This species prefers full to partial sun and wet to moist soil. Height is 5'. Bloom time July-September. Winter hardy from zones 3 to 8. Plant spacing is 3'-4'. **Deer Resistant.**

128. Sweet Joe Pye Weed (*Eutrochium purpureum*) Native Perennial This species prefers partial shade to shade and medium wet to medium dry soils. Height 7'. Bloom time is July-September. Winter hardy from zones 3 to 8. Plant spacing 3'-4'. **Deer Resistant.**

129. Pretty Betsy Jupiter's Beard is a tough, easy to grow, long blooming, first year flowering perennial hard to beat for providing garden color with little maintenance. Jupiter's Beard plants, also known as Red Valerian, produce clusters of profuse rose-red in spring and summer. Blooms attract hummingbirds and butterflies, and are excellent cut flowers. Jupiter's Beard **is a rabbit and deer resistant plant** which grows to 3 ft. tall. Jupiter's Beard thrives on neglect, grows in dry and moist soil, and is happy in sun or light shade. A winter hardy perennial to zone 5. Plant 1.5 to 2' apart. Full sun to part or light shade.

130. Snow Cloud Jupiter's Beard is a tough, easy to grow, long blooming, first year flowering perennial hard to beat for providing garden color with little maintenance. Jupiter's Beard plants produce clusters of profuse white in spring and summer. Blooms attract hummingbirds and butterflies, and are excellent cut flowers. Jupiter's Beard **is a rabbit and deer resistant plant** which grows to 3 ft. tall. Jupiter's Beard thrives on neglect, grows in dry and moist soil, and is happy in sun or light shade. A winter hardy perennial to zone 5. Plant 1.5 to 2' apart. Full sun to part or light shade.

131. Kniphofia (*Kniphofia uvaria*) Also called Red Hot Pokers and Torch Lilies. The plants tall stem supports 8-inch full spikes in uniform warm colors of red, orange, and yellows-making nice cut flowers. Prefers full sun and moist, well-drained soil. Height 36" to 40". Bloom time summer to fall. Grows in zones 5 to 10. Plant spacing 18" -24".

Deer Resistant.

132. Hidicote Blue English Lavender is a compact, heavy blooming Lavender, with scented silver-gray leaves and fragrant, deep violet blue summer flowers. Most often seen as a small hedge or as an edging plant. Can thrive in containers where the fragrant flowers and aroma can be most appreciated. Prefers full sun and gritty, well-drained soils. Bloom time early summer to late summer. Grows in zones 6-9. Plant spacing is 18". **Deer Resistant.**

133. Lavance Deep Purple Lavender has dwarf, bushy, well-branched 12 in. plants, covered in masses of fragrant, intensely colored, deepest purple-blue flowers all summer long. Blooms the first year from seed. Flower spikes are excellent for cutting, one of the best lavenders for drying. Lavance Deep Purple produces superb perfumes and potpourris. Use in containers, on dry slopes, for edging, or in mixed borders. Grow in full sun and well-drained soils. Height 12". Grows in zones 5 to 10. Plant spacing 12". **Deer Resistant.**

134. Munstead Dwarf Lavender is one of the most popular lavenders. Great for decorative purposes when dried, it makes an excellent fragrance for sachets. Bushy plants are compact with spikes of deep lavender blooms. Attractive in borders with its showy, aromatic gray-green foliage. Low maintenance. Attracts bees and butterflies. Heat and drought tolerant. Prefers full sun and gritty, well-drained soils. Height 16". Grows in zones 5 to 9. Plant spacing 16" to 20" **Deer Resistant.**

135. Blue Starship Lobelia An earlier flowering lobelia with improved branching, and controlled habit of growth. Prefers high temperatures, humidity, and moisture. Attracts hummingbirds and butterflies. Upright growth. Prefers full sun and moist well-drained soil. Height 24" to 30". Spreads 10"-12". Grows in zones 6-10.

136. Deep Rose Starship Lobelia An earlier flowering lobelia with improved branching, and controlled habit of growth. Prefers high temperatures, humidity, and moisture. Attracts hummingbirds and butterflies. Upright growth. Prefers full sun and moist well-drained soil. Height 24" to 30". Spreads 10"-12". Grows in zones 6-10.

137. Great Blue Lobelia (*Lobelia siphilitica*) **Native Perennial** Great Blue Lobelia is a short-lived perennial that grows deep blue-violet flowers on spikes. These flowers attract bees, butterflies, and hummingbirds. The plant likes full to partial sun and moist to wet soils. Height to 3 feet. Blooms July to October. Winter hardy in zones 3-9. Spacing of 12 to 18 inches. **Deer Resistant.**

138. Maltese Cross Lychnis (*Lychnis chalcedonica*) Also called Chalcedonica or Jerusalem Cross. An heirloom flower introduced in colonial times. Prefers full sun to partial shade and well-drained soils. Height 30" to 34". Bloom time is summer. Grows in zones 3 to 10. Plant spacing 12" to 18". **Deer Resistant.**

139. Rose Campion (*Lychnis coronaria*) Features soft, woolly, silver-gray leaves with bright red flowers. Prefers sun to partial shade and well-drained soils. Height 28" to 32". Bloom time is summer. Grows in zones 3 to 10. Plant spacing is 18". **Deer Resistant.**

140. Rosett Lychnis (*Lychnis Viscaria splendens Rosett*) A short Lychnis known for exceptional hardiness, and is tolerant of poor soils and little water. Prefers full sun to partial shade and well-drained soils. Height is 18" to 20". Bloom time is summer. Grows in zones 3 to 10. Plant spacing is 12". **Deer Resistant.**

141. Purple Love Grass (*Eragrostis spectabilis*) **Native Perennial** An attractive warm-season grass that thrives in many conditions including roadside salt and beneath walnut trees. Prefers full to partial sun and dry soil conditions. Height is 2'. Bloom time is July to August. Grows in zones 3 to 9. Plant spacing 1' to 2' **Deer Resistant.**

142. Russell's Mixed Lupines feature a variety of colors in this beautiful legume. Plant height 24 to 36 inches. Plant spread 12 to 18 inches. Plant in full sun or part shade. **Plants will resist deer and rabbits.** Nectar-rich flowers attract hummingbirds and butterflies.

143. Rose Mallow (*Hibiscus laevis*) **Native Perennial** Greatly resembles its cousin, the flowering hibiscus, with its big pink blossoms, however it is native. Prefers full to partial sun and wants wet to medium-wet soils. Grows to 5'. Bloom time is July-September. Grows in zones 4 to 9. Plant spacing is 2' to 3'. **Deer Resistant.**

144. Orange Marguerite Daisy (*Anthemis sancti-johannis*) Features daisy-like flowers that give long-lived color in borders. Prefers full sun and well-drained soils. Height 24". Bloom time is early summer to early fall. Grows in zones 3 to 7. Plant spacing 16". **Deer Resistant.**

145. Yellow Marguerite Daisy (*Anthemis tinctoria Keylayi*) A free-flowering drought-tolerant perennial. Good for cut flowers and drying. Prefers full sun and well-drained soils. Height 30". Bloom time is early summer to early fall. Grows in zones 3 to 7. Plant spacing 16". **Deer Resistant.**

146. Meadow Parsnip (*Thaspium trifoliatum flavum*) **Native Perennial** Meadow Parsnip is a member of the Carrot Family. It is a host plant to Black Swallowtail larvae. Prefers full sun to partial shade and moist to medium-wet soils. Height is 2'. Bloom time is May to July. Grows in zones 4 to 8. Plant spacing is 12" to 18". Note: Do not confuse this plant with the invasive Wild Parsnip.

147. Meadowsweet (*Spiraea alba*) A shrublike alternative to Japanese Spirea. Meadowsweet likes full to partial sun and soil on the moist side. Grows to a height of 4'. White blooms occur July- August. Winter hardy in zones 3-7. Plant spacing 1'-3'.

148. Butterfly Milkweed (*Asclepias tuberosa*) **Native Perennial** Butterfly Milkweed is a plant of dry, well drained soils. Does well in the home garden and adds diversity in prairie plantings. Attracts bees, butterflies, hummingbirds, and is the host plant to Monarchs, Grey Hairstreaks, and Queens. Attracts monarch butterflies who lay eggs on the leaves which are consumed by caterpillars. Flowers are orange. Needs full to partial sun and likes dry to moist soil. Height is 2' to 4'. Bloom time is June to August. Hardy to zone 3. Plant spacing 1-3'. **Deer Resistant.**

149. Common Milkweed (*Asclepias syriaca*) Native Perennial Not as common as it once was due to changes in agricultural practices and increases in manicured turf. This milkweed is adaptable to a wide variety of soil moistures and does great in "Wild" gardens. Attracts birds, bees, butterflies, and is the host plant of the Monarch butterfly. Spreads by underground stolons--so you may want to plant it in a bottomless bucket. Flowers pinkish. Needs full to partial sun and does well in moist soil but will grow in medium dry to medium wet soil. Height 3' to 5'. Blooms June to August. Grows in zones 3 to 8. Plant spacing 2' to 3'. **Deer Resistant.**

150. Swamp Milkweed (*Asclepias incarnata*) Native Perennial Also called Red Milkweed or Rose Milkweed. Prefers full to partial sun and moist to wet soils. Height is 4'. Bloom time is June to August. Grows in zones 3 to 9. Plant spacing is 18" to 36". **Deer Resistant.**

151. Mistflower (*Conoclinium coelestinum*) Native Perennial Also known as Hardy Ageratum, Wild Ageratum, and Blue Boneset. Prefers partial sun and medium wet to medium dry soils. Plant height is 2'. Bloom time is September-October. Winter hardy from zone 5 to 9. Plant spacing 1' to 2'. **Deer Resistant.**

shade.

152. Money Plant or Honesty grow 2-3 ft. tall with heart-shaped leaves and wonderfully fragrant, ½ in. spring flowers in purple shades and occasionally in white. Money Plants look terrific among late flowering daffodils. The flowers are followed by brown seed pods. The ripened pods release their outer cover along with the seeds revealing translucent, silver dollar-like circles. Money Plant blooms are excellent cut flowers and seed pods are outstanding in dried arrangements. **Biennial plants** — However, Money Plant self-sows and returns year after year. Winter hardy to zone 5. Plant 12-18" apart. Full sun to part or light

153. Monkey Flower (*Mimulus ringens*) Native Perennial With flowers that resemble the face of a monkey, this is a wetland plant. Prefers full to partial sun and wet to medium wet soils. Plant height is 2'. Bloom time is June-September. Winter hardy from zone 3 to 9. Plant spacing 1' to 2'. **Deer Resistant.**

154. Mountain Mint (*Pycnanthemum virginianum*) **Native Perennial** Mountain Mint prefers full to partial sun and wet to medium dry soils, but prefers moderately moist soil. Height is 3'. Bloom window is June through September. Very attractive to bee, butterflies, and other pollinators. Winter hardy from zone 3 to 7. Plant spacing 12" to 18". **Deer Resistant.**

155. Blue Nepeta or Catmint produces bushy, 1-2 ft. tall plants covered in spikes of brilliant blue summer flowers. Leaves bright green, veined, and lance shaped. Tough enough to use as a ground cover in poor dry soils, beautiful enough to edge flower borders. Prefers full to partial sun and well-drained soils. **Deer and rabbit resistant.** Attract bees and butterflies. Height 1' to 2'. Winter hardy to zone 4. Plant 12-18" apart.

156. New Jersey Tea (*Coenothus americanus*) **Native Perennial** A spectacular bloomer that prefers full to partial sun and moist to dry soils. Height is 3'. Bloom time is June-August. Winter hardy from zones 3 to 9. Plant spacing 18"-36".

157. Pink Obedient Plant (*Physostegia virginiana* Pink) **Domesticated Native Perennial** Features of pink spikes on compact, clump-forming perennial. Prefers full sun to partial shade and well-drained soils. Height 24" to 30". Bloom time: summer. Grows in zones 3 to 9. Plant spacing 18" to 24". **Deer Resistant.**

158. Obedient Plant (Purple) (*Physostegia virginiana*) **Native Perennial** If the flowers of Obedient Plant are manipulated, they tend to stay in that position for a while hence the name. A very adaptable plant, this will do well when planted in both drier and moist soil conditions and most light requirements. Long lasting pink and purple blooms adorn the plant and will pop up anywhere from August through November. It's an excellent nectar source for butterflies and hummingbirds. Prefers full to partial sun and moist to wet soil. Height 4'. Bloom time is August-September. Grows in zones 3 to 9. Plant spacing 1' to 2'. **Deer Resistant.**

159. White Obedient Plant (*Physostegia virginiana* White) **Domesticated Native Perennial** Features of pink spikes on compact, clump-forming perennial. Prefers full sun to partial shade and well-drained soils. Height 18" to 24". Bloom time: summer. Grows in zones 3 to 9. Plant spacing 18" to 24". **Deer Resistant.**

160. Pearly Everlasting (*Anaphalis margaritacea*) Native Perennial Features pearly mounds of flowers. Prefers full to partial sun and medium dry to dry soils. Height 2'. Bloom time is June to September. Grows in zones 2 to 7. Plant spacing is 1' to 3'. **Deer Resistant.**

161. Alpine Mix Alpine Poppy are a perennial poppy that features waves of 1.5" flowers in shades of orange, yellow, white, and salmon. Prefers full sun to partial shade and well-drained soils. Height 8". Blooms time is from late spring to early summer. Winter Hardy to Zone 4. Will often self-sow. Plant 8"-12" apart.

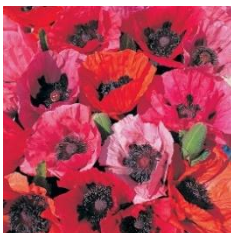

162. Beauty of Livermere Oriental Poppy also known as the "Great Scarlet Poppy." Prefers full sun and well-drained soils. Height is 3' to 4'. Bloom time is May and June. Grows in zones 2 to 7. Space 12" to 18". **Deer Resistant.**

163. Brilliant Oriental Poppy Features bright orange petal with dark centers. Prefers full sun and well-drained soils. Height 2.5' to 3'. Bloom time is May-June. Grows in zones 3-7. Plant spacing is 12" to 18". **Deer Resistant.**

164. Checkers Oriental Poppy Features black and white flowers. Prefers full sun and well-drained soils. Height 24" to 36". Bloom time late spring. Grows in zones 4 to 9. Plant spacing 14". **Deer Resistant.**

165. Fruit Punch Oriental Poppy Features 5" ruffled, papery flowers in various shades of red. Prefers full sun and well-drained soils. Height 2'. Grows in zones 3 to 7. Plant spacing is 12" to 18". **Deer Resistant.**

166. Royal Wedding Oriental Poppy feature large pure-white silky flowers with black centers in late spring and early summer. Prefers full sun and well-drained soils. Height 3'. Grows in zones 3 to 7. Plant spacing is 12" to 18". **Deer Resistant.**

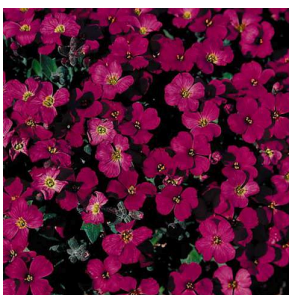

167. Prairie Dock (*Silphium terebinthinaceum*) **Native Perennial** One of the largest and tallest of native plants. Features leaves with the texture of sandpaper that may be 18" long and 12" wide. Yellow flowers are borne on tall stalks. Prefers full to partial sun and medium-wet to medium-dry soils. Height up to 9'. Bloom time July-September. Grows in zones 4 to 8. Plant spacing 2' to 4'. **Deer Resistant.**

168. Rattlesnake Master (*Eryngium yuccifolium*) **Native Perennial** Not the showiest of native plants, however, Rattlesnake Master is frequented by native bees, moths, and flies. It is a host plant for the Black Swallowtail butterfly. Prefers full sun and medium wet to medium dry soil. Plant height is 4". Bloom time is July -September. Winter hardy in zones 4-9. Plant spacing is 18"-24". **Deer Resistant.**

169. Cascade Blue Rock Cress is a spreading, evergreen perennial. Plants form carpets of stunning, brilliant dark blue spring flowers. Cascade Blue rock cress is a superb ground cover for dry banks, underplanting shrubs, or in rock gardens, between flagstones, or along pathways. Plants grow 3-6 in. high, and spread 1-1.5 ft. across. Prefers part shade in hot climates, full sun where summers are relatively cool. Plants prefer lean soil, need well-drained soil. Cut back halfway after bloom. Flowers attract bees. Winter hardy to zone 4. Plant 12" apart. Full sun to part shade.

169A. Cascade Red Rock Cress is a spreading, evergreen perennial. Plants form carpets of stunning, brilliant magenta spring flowers. Cascade Red rock cress is a superb ground cover for dry banks, underplanting shrubs, or in rock gardens, between flagstones, or along pathways. Plants grow 3-6 in. high, and spread 1-1.5 ft. across. Prefers part shade in hot climates, full sun where summers are relatively cool. Plants prefer lean soil, need well-drained soil. Cut back halfway after bloom. Flowers attract bees. Winter hardy to zone 4. Plant 12" apart. Full sun to part shade.

170. Golden Glow Rudbeckia (*Rudbeckia laciniata*) **Native Perennial** Also called Tall Coneflower. Prefers partial shade, but will tolerate full sun to shade if the soil is moist. Height 7'. Bloom time is July – October. Grows in zones 3 to 8. Plant spacing 2' to 4'. **Deer Resistant.**

171. Goldsturm Rudbeckia or Gloriosa daisy or Black-eyed Susan. **Domesticated Native Perennial** Goldsturm Rudbeckia is heat and drought resistant. Long, stiff stems with golden yellow, 3 to 4" daisy-like blooms make wonderful cut flowers. Former Perennial Plant of the Year. Prefers full sun and well-drained soils. Height of 24" to 36" Space 12 to 18" apart. Hardy to zone 3.

172. Blue Steel Russian Sage (*Perovskia*) An aromatic plant with silvery foliage and small, blue flowers on strong, silver stems. Heat and drought tolerant. Likes full sun and well-drained soils. Height 18-36 inches. Spreads up to 28 inches.

173. New Dimension Blue Salvia Intense, rich-violet, long-lasting flowers on a compact, well-branched, heavy-blooming, heat-tolerant plant. Height 10" to 12" plant. Likes full sun to partial sun and well-drained soil. Plant 12" to 18" apart. Winter Hardy to Zone 5

174. New Dimension Rose Salvia Rich rose color, long-lasting flowers on compact, well-branched, heavy blooming, heat tolerant plants. Likes full to partial sun and well-drained soils. Height 10" to 12". Winter hardy to zone 5. Plant 12" to 18" apart.

175. Saponaria or Soapwort has trailing growth to 8-12 in. tall and 3 ft. across. Delightful, rose pink, phlox-like flowers are held in loose sprays. Blooms cover the plants in May and June. Soapwort is a terrific ground cover, or allow plants spill over the side of raised beds. Prefers full to partial sun and well-rained soils. Winter hardy to zone 2. Plant 18" apart.

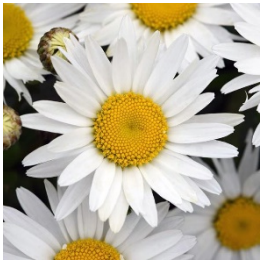

176. Sea Lavender A hardy perennial that produces up to a dozen 18-to-24-inch multi-branched flower head featuring hundreds of ¼ inch blooms. Excellent as a cut flower. Prefers full sun and well-drained soils. Height 24" to 30". Winter Hardy to Zone 3. Space 18 to 24 inches apart.

177. Alaska Shasta Daisy is an easy to grow perennial that features armloads of extra-large, 6 in. daisies in late spring and summer. Will bloom the first year from seed. Prefers full to partial sun and well-drained soils. Height 3' to 4'. Winter hardy to zone 3. Plant 12" to 24" apart. **Deer Resistant.**

178. Crazy Daisy Shasta Daisy has exceptional 2-3" white, frilly double white summer flowers. Prefers full to partial sun and moist, well-drained soils. Height 24" to 30". Grows in zones 4 to 8. Plant 12" to 24" apart. **Deer Resistant.**

179. Madonna Shasta Daisy A short Shasta Daisy with large 3" blossoms. Prefers full to partial sun and well-drained soils. Height 8" to 10". Width 8" to 12". Winter hardy to zone 5. Plant spacing of 12" to 18". **Deer Resistant.**

180. Snow Lady Shasta Daisy is an early blooming, 12-15 in. tall perennial that produces scads of 2.5 in. snow white flowers with gold eyes, from late spring until frost. Great at front of borders or in pots. Snow Lady is the best performing, longest blooming, dwarf Shasta Daisy available from seed. An All-America Selections Winner. Prefers full to partial sun and well-drained soils. Height 12" to 15". Winter hardy to zone 5. Plant 12" to 24" apart. **Deer Resistant.**

181. Snow-in-Summer Forms low growing, dense silvery-gray carpets to 6 in. tall and 2-3 ft. across. In early summer the plants are smothered in masses of showy snow-white flowers. An excellent choice for a small-scale ground cover, and edging along paths, between steppingstones, or spilling over the sides of large containers. Prefers full sun and well-drained soils. Height 6". Grows in zones 3 to 10. Plant 12". **Deer Resistant.**

182. Shimmer Mixed Spiderwort is an easy-to-grow, trouble-free perennial with grass-like leaves and three-petaled 1 to 3 inch flowers in shades of blue, red, and white. Once established, spiderworts will bloom throughout the summer. Will grow in full sun to full shade and in most soils. Height is 18". Plant 12 to 18 inches apart. Winter Hardy to Zone 5. **Limited quantity.**

183. Ohio Spiderwort (*Tradescantia ohiensis*) **Native Perennial** An attractive native with blue three-petaled flowers. Likes full sun to partial sun. Although spiderwort favors moist soil, it will grow in very dry locations. Height is 3 feet. Bloom window is May to July. Hardy in Zones 4 to 9. Plant spacing is 12 to 18 inches. **Deer Resistant.** **Note: Xerces Society has listed Ohio Spiderwort as of "Special Value to Native Bees."**

184. Sundrops (*Oenothera pilosella*) **Native Perennial** Sundrops are a member of the evening primrose family—though it readily blooms during daylight hours. Sundrops prefer full to partial sun and soil that ranges from medium dry to medium wet. Height is 2 feet. Bloom window is May-June. Readily attracts bees and butterflies. Winter hardy from zone 3 to 8. Plant spacing is 18-24"

185. Downy Sunflower (*Helianthus mollis*) **Native Perennial** Downy sunflowers prefer full to partial sun and moist to medium dry soil. Height to 5'. Bloom time is August -September. Winter hardy from zones 3 to 9. Plant spacing is 2'-3'. Note: This sunflower spreads and may not be suitable for small planting areas. **Deer Resistant.**

186. Ox-eye Sunflower (*Heliopsis helianthoides*) **Native Perennial** Also known as Early Sunflower, False Sunflower, and Sweet Smooth Oxeye. Likes full to partial sun. Soils that are medium-wet to medium-dry. Height 5 feet. Blooms from June to September. Winter hardy from Zones 3 to 8. Plant spacing is 18 to 36 inches apart. **Deer Resistant.**

187. Saw-tooth Sunflower (*Helianthus grosseserratus*) **Native Perennial** This sunflower features big yellow blossoms and toothed leaves. Height if given room may be 12', but only grows to 5' if planted densely—average height is 8'. Important food source for multiple species of native bees and butterflies. Likes full to partial sun and medium wet soil to medium dry soil. Winter hardy from zone 3 to 8. Plant spacing (see heights above). Note: This sunflower, like most native sunflowers, spreads by rhizomes and may not be suitable in small planting areas. **Deer Resistant.**

188. Tall Sunflower (*Helianthus giganteus*) **Native Perennial** This sunflower grows to a height of 8". It prefers full to partial sun and moist to medium-wet soil. Bloom time is July -September. Winter hardy in zones 3-9. Plant spacing is 3'-4'. Note: This sunflower, like most native sunflowers, spreads by rhizomes and may not be suitable in small planting areas. **Deer Resistant.**

189. Sneezeweed (*Helenium autumnale*) **Native Perennial** Note: Sneezeweed is a misnomer for its pollen is transferred by insects, not by the wind. Its other name is Helenium. This plant is a must for the native plant garden. Sneezeweed prefers full to partial sun and moist to wet soil. Height is 4'. Bloom time is August -October. Winter hardy from zones 3 to 9. Plant spacing 18"- 24". **Deer Resistant.**

190. Showy Tick Trefoil (*Desmodium canadense*) **Native Perennial** Showy Tick Trefoil is a native legume. The magenta of its flowers adds delightful color to native areas. A deep taproot makes it drought tolerant. Flower color is pink or purple. Height is 3 to 6 feet. Likes full to partial sun and dry to moderately moist soils. Height is 5'. Bloom time is July to August. Attracts bees, birds, butterflies, and hummingbirds. Grows in zones 3 to 7. Plant spacing is 1'. Host plant to the Eastern Tailed Blue Butterfly, Silver-spotted Skipper, and the Hoary Edge.

191. Verbascum (*Verbascum phoenicium*) A delightful mix of free flowering violet, rose, and whit Verbascum. Prefers full sun and well-drained soil. Height 24" to 6". Bloom time is late spring through summer. Grows in zones 5 to 8. Plant spacing 18" to 24". **Deer Resistant.**

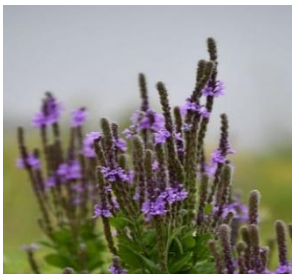

192. Katie's Candles Mix Verbascum A free-flowering mix of violet, red, pink, and white flowers. Prefers full to partial sun and well-drained soils. Height 3'. Winter hardy to zone 5. Plant spacing 18".

193. Southern Charm Verbascum is an especially refined form of Verbascum that produces an abundance of 1" five-petaled, circular flowers on tall spikes. Grows 2' to 3' tall. Flowers are a blend of pastel creamy yellow, soft lavender, and peachy rose shades. Plant 18" apart. Rabbit and deer resistant. Full sun to part shade.

194. Blue Vervain (*Verbena hastata*) Native Perennial Blue Vervain has tiny purple flowers that adorn a long spike on this attractive and useful moist area plant. Blooming from the bottom to the top a few at a time give an extended bloom period of up to 2 months. Attracts tiny bees and other pollinators. Flower color is blue to purple. Prefers full sun to partial sun and likes moist to wet soil. Height is 5'. Bloom time is July to September. Grows in Zones 3 to 8. Plant spacing is 18-24". **Deer Resistant.**

195. Hoary Vervain (*Verbena stricta*) Native Perennial An important seed plant for mammals and birds. Serves as a host plant for the Common Buckeye Butterfly larva. Prefers full to partial sun and medium-dry to dry soils. Height 2'. Bloom time is June -September. Grows in zones 3 to 8. Plant spacing 10' to 12". **Deer Resistant.**

196. White Vervain (*Verbena urticifolia*) Native Perennial White Vervain is an important ecological plant. Prefers partial shade and moist to medium-wet soils. Height is 5'. Bloom time is June to October. Grows in zones 3 to 9. Plant spacing 18" to 24". **Deer Resistant.**

197. Blue Streak Veronica (*Veronica gentianoides*) An elegant plant with upright spikes of lavender blue veined flowers. Prefers Full sun to partial shade and average soil. Height 18". Bloom time is late spring to early summer. Grows in zones 3 to 7. Plant spacing is 12". **Deer Resistant.**

198. Blue Veronica (*Veronica spicata*) Features extra-long blue flower spikes. Prefers full to partial sun and well-drained soils. Height 24". Grows in zones 3 to 8. Plant spacing 10". **Deer and rabbit resistant.**

199. Royal Blue Veronica (*Veronica teucrium*) A carefree, mounding form of veronica. Prefers full sun to partial shade and average soil. Height 18". Bloom time early to late summer. Grows in zones 4 to 8. Plant spacing is 12". **Deer Resistant.**

200. Virgin's Bower (*Clematis virginiana*) **Native Perennial** Virgin's Bower is a vine that can climb up to 9 feet. Note: This is not the same plant as Sweet Autumn Clematis (*Clematis paniculate*). Virgin's Bower prefers full to partial sun and moderately moist to medium-wet soils. Bloom window is July to September. Winter hardy from zone 3 to 9. Plant spacing is 3-4'. **Deer Resistant.**

201. Whorled Rosin Weed (*Silphium trifoliatum*) **Native Perennial** Features sunflower-like blossoms and whorled leaves. Prefers full to partial sun and likes moist to medium-dry soils. Height is 5'. Bloom time is July to September. Winter hardy in zones 5 to 8. Plant spacing 2'-3'. **Deer Resistant.**

202. Wild Senna (*Senna hebecarpa*) **Native Perennial** Wild Senna is an important plant for bees, butterflies, and larger birds like wild turkeys. Wild Senna likes full to partial sun and soils that are moist to medium-wet. Height of 5'. Its bright yellow flowers bloom in July and August. Grows in zones 4 to 8. Plants spacing of 24" to 30".

203. Wingstem (*Verbena alternifolia*) **Native Perennial** Wingstem is a tall clump forming perennial that is native to woodland areas. Prefers full to partial sun and moist soils. Height is 4' to 8'. Bloom time is August to October. Grows in zones 5 to 8. Plant Spacing is 2' to 4'. **Deer Resistant.**

204. Little Treasure Deep Rose Wall Rockcress has sweetly scented, brilliant rose-pink flowers that cover the 4-6 in. tall, 9-12 in. wide plants in mid spring. Winter hardy to zone 3. Little Treasure Deep Rose wall rockcress is a Fleuroselect Quality Mark winner. Plant 9-12" apart. Full sun to part shade in hot climates.

205. Colorado Mix Yarrow is a strong performer that will bloom from summer to fall. Flowers come in shades of apricot, beige, pink, red, white, and yellow. Prefers full sun and does well in normal, well-drained soils. Very heat and drought resistant. Height 30". Bloom time is summer. Grows in zones 3 to 8. Plant spacing 2' to 3'. **Yarrow is deer and rabbit resistant.**

206. Wormwood (*Artemisia absinthium*) Features finely-divided foliage that is gray-green in color and is aromatic. Prefers full sun to partial shade and poor, sandy, well-drained soils. Height 24" to 36". Bloom time is midsummer to early fall. Grows in zones 3 to 8. Plant spacing 18" to 24". **Deer resistant.**

SELECT ANNUALS AND HANGING BASKETS GROWN AT CLOVERLAND FARMS' GREENHOUSES

207. Aloha Blue Ageratum features masses of flowers on well-branched plants. Plant height is 6 to 8 inches and spreads 6 to 8 inches. Full sun. Sold in 4-packs for \$2.

208. Aloha White Ageratum features masses of flowers on well-branched plants. Plant height is 6 to 8 inches and spreads 6 to 8 inches. Full sun. Sold in 4-packs for \$2.

251. Cherry Tidal Wave Petunias Grows to a height of 16 to 22 inches but has a spread of 30 to 60 inches. **A strong alternative to Supertunia Bubblegum Petunias at one-half the price.** Full Sun to Partial Sun. Sold individually in 3.5-inch pots for \$2.

252. Hot Pink Tidal Wave Petunias Grows to a height of 16 to 22 inches but has a spread of 30 to 60 inches. **A strong alternative to Supertunia Bubblegum Petunias at one-half the price.** Full Sun to Partial Sun. Sold individually in 3.5-inch pots for \$2.

253. Purple Tidal Wave Petunias Grows to a height of 16 to 22 inches but has a spread of 30 to 60 inches. **A strong alternative to Supertunia Bubblegum Petunias at one-half the price.** Full Sun to Partial Sun. Sold individually in 3.5-inch pots for \$2.

254. Happy Trails Mixed Portulaca features well-branched trailing plants with a vivid flower color range. **Excellent plant for hot, full sun garden positions.** Height 8 to 10 inches. Plant spread 10 to 12 inches. Full sun. Sold in 4-packs for \$2. 10-inch Plastic Hanging Baskets with 3 to 4 plants for \$10.

255. Cora Vinca XDR is an upright vinca with large flowers and thick glossy dark green foliage. Plants are well-branched. Ideal for containers, planters, and hanging baskets. Height is 12 to 16 inches. Plant spread is 12 to 16 inches. **Likes full sun and does well in hot, dry conditions.** Sold in 4-packs for \$2.

256. Cora Cascade Vinca XDR is a trailing vinca with large flowers and thick glossy dark green foliage. Plants are well-branched and begin spreading early on. Ideal for containers, planters, and hanging baskets. Height is 6 to 8 inches. Plant spread is 32 to 36 inches. **Likes full sun and does well in hot, dry conditions.** Sold in 4-packs for \$2. 10-inch Plastic Hanging Baskets with at 4 plants is \$10.

SELECT VEGETABLE PLANTS GROWN AT CLOVERLAND FARMS' GREENHOUSES

257. Early Jalapeno Peppers—60 to 65 days. Deep green, 3 ½-inch by 1 ½-inch fruits with thick walls that mature to brilliant red when they reach their hottest point. Early and better adapted to cool conditions than other jalapenos. Excellent for pickling with a Scoville rating of 3,500 to 4,500. Ideal for using in fresh Mexican dishes. Compact, sturdy plants grow 26 to 36-inches tall and are heavy yielders. Well-established plants are sold individually for \$2.

258. Habanero Orange Peppers—90 days. One of the pungent hot peppers and late maturing. These productive plants support large numbers of thin-fleshed, wrinkled fruits that turn from light green to golden orange at maturity. The roughly 2-inch by 1 ½-inch fruits can be used fresh or dried. Use care when handling seeds and fruit. Well-established plants are sold individually for \$2.

259. Sweet Banana Peppers—66 days. Sweet, banana-shaped fruits are 6 to 8-inches long and 2 inches across. Matures from light yellow to bright red. Heavy yielding plants grow 16 to 24-inches tall. Well-established plants are sold individually for \$2.

260. Hungarian Hot Wax Peppers—70 days. An early, highly prolific hot pepper with bright waxy yellow fruit that turns orange-red when ripe. Fruits are 5 to 6-inches long and 1 ½-inches wide at the shoulder. Very popular for canning. Well-established plants are sold individually for \$2.

61. King of the North Sweet Bell Peppers—70 days. A very reliable sweet bell pepper. Sturdy plants produce early, heavy yields of blocky, thick-walled, 3 to 4 lobed fruits that ripen from green to red. Excellent for cooking or eating fresh. Well-established plants are sold individually for \$2.

262. Snackabelle Red Peppers—75 days. Thick-walled, blunt-ended, 2 to 2 ¼-inch peppers that have rich, sweet flavor. Ideal for eating either green or red. Fruits have an “easy-out” stem and seeds—simply push down or cut around cap to release seed cavity for quick cleaning. Compact, mounded plants are great for container gardening. Highly resistant to Bacterial Leaf Spot Races 1,2,3,7,8, and Tobacco Mosaic Virus. Well-established plants are sold individually for \$2

263. Amish Paste Tomatoes—74 days (Indeterminate). One of the meatiest and most flavorful Roma-type paste tomato we have found—Bright red, large fruits weigh about 8 oz. Excellent for slicing fresh and canning as fruits are not too acidic. A 4-pack of plants is \$2

264. Beefsteak Tomatoes—80 days (Indeterminate). Very large, flattened, brilliantly red fruits are slightly ribbed and weigh up to 2 pounds. Solid, meaty, deep red flesh is juicy with a rich, sub-acid, heirloom tomato flavor. Excellent for slicing or canning and a heavy yielder. Well-established plants are sold individually for \$2

265. Best Boy Tomatoes—75 days (Indeterminate). Beautiful bright red, firm, 8-ounce globe-shaped fruits. Excellent choice for mid-early production. Vigorous plants are heavy yielders. Well-established plants are sold individually for \$2

266. Early Girl Tomatoes—57 days (Indeterminate). One of the earliest slicing varieties. Large, bright red fruits averaging 4 to 6 ounces. Features firm texture, meaty, mouth-watering flavor, and largely blemish-free skin. Compact plants are great for container gardening. Well-established plants are sold individually for \$2.

267. Jet Star Tomatoes—72 days (Indeterminate). This exceptional tomato plant produces large quantities of tasty red fruits usually free from cracks and blemishes. Shows resistance to F1 Fusarium wilt and Verticillium wilt. **A low-acid tomato.** Well-established plants are sold individually for \$2

268. Mortgage Lifter Tomato ---80 days. (Indeterminate) This huge heirloom beefsteak tomato consistently wins taste-tests. Well-established plants are sold individually for \$2

269. Pineapple Tomato ---85 days. (Indeterminate) This large heirloom tomato features a tropically fruity-sweet taste. Well-established plants are sold individually for \$2

270. Red Grape Tomato Features good disease protection and clumps of sweet grape tomatoes. Well-established plants are sold individually for \$2

271. Roma Paste Tomatoes A 4-pack of plants is \$2

272. San Marzano Paste Tomatoes—85 days (Indeterminate). This old-style Italian Roma type is later to mature than Roma but produces larger fruits. The bright red fruits measure 3 1/2 to 4 inches in length and have a very solid content that makes them ideal for canning. These tomatoes hold well on the vine and in storage. A 4-pack of plants is \$2

273. SunSugar Hybrid Tomato—62 days (Indeterminate) A hybrid orange cherry tomato with exceptional taste. Well-established plants are sold individually for \$2

274. Supersonic Tomatoes—75 days (Indeterminate). Supersonic produces heavy yields of large, meaty tomatoes of excellent quality. Fruits are deeply oblate in shape, smooth, and largely crack-free. Widely grown for roadside sale. Well-established plants are sold individually for \$2

275. Supersweet 100 Tomatoes—65 days (Indeterminate). Plants produce long trusses of 100 or more, super-sweet, deliciously-flavored cherry tomatoes that are about 1-inch in diameter and weigh about 1 ounce. Fruits are extra-high in Vitamin C and terrific in salads. High yielding plants bear continuously throughout the season. **Asked for by our customers!** Well-established plants are sold individually for \$2

276. Yellow Pear Tomatoes—75 days (Indeterminate). These tall plants produce a continuous supply of mild flavored, pear-shaped tomatoes borne in clusters. Great for snacking and in salads. Well-established plants are sold individually for \$2
